

CKCA members receive:

- A Packsize installation fee waiver (valued at \$15,000 CAD)
- Discount pricing for corrugated material, tape, labels, and more

With Packsize, you can make custom right-sized boxes for your cabinetry products as soon as they come off the production line. From corrugated boxes and corner protection to trays and caps, Packsize has you covered.

- **Eliminate inventory** – until now, box inventory was one of the most daunting problems for cabinet suppliers. You now have the flexibility to run multiple batches of the same items as needed, or pre-program known product SKUs in advance.
- **Better throughput** – increase production capacity for improved customer expectations and delivery cycles.
- **Design flexibility** – produce what you need as you need it.
- **Less infrastructure** – gain back warehouse space and put more cabinets on a truck.
- **Minimized damages** – use Packsize machines to create the right-sized box that protects your product in transit.
- **Smarter Packaging for a Healthy Planet[®]** – using eco-friendly packaging means less material is needed to ship consumer goods via dimensionally-optimized delivery services that use less fuel, thus reducing the overall carbon footprint of this process.
