

Richelieu Takes Your Kitchen Designs to the Next Level

WITH THESE 10 MUST-HAVE IN-CABINET ACCESSORIES

Your clients are looking to remodel their kitchen. Given the amount of time they spend in the kitchen, as most people typically do, they will most likely appreciate having a few accessories to make their life easier. After all, everyone wants a better functioning, more efficient kitchen space.

Why sell an empty cabinet with simple shelving, when you can optimize the functionality of that space with specially designed systems that improve organization and accessibility? And who better to recommend these accessories than you, the kitchen designer? In-cabinet accessories are a great way to add value to your designs and deliver a dream kitchen to your clients. They will not only help boost the quality of life of your clients but also your bottom line.

With so many options to choose from, we asked our senior designer to share her top 10 must-haves for an optimized and organized kitchen.

PANTRY

CONVOY LAVIDO

The Convoy Lavido is the ultimate sliding storage solution for dry food and canned goods. This pullout pantry system comes with 4–5 height-adjustable shelves. It slides out completely from the cabinet giving a 360° view and access to all the contents. It's an ideal solution for keeping contents organized and easily accessible.

DISPENSA SWING

The Dispensa Swing is a sliding and swiveling basket kit for wall units that opens fully and swivels from left to right to give full access to the contents. It comes with a variety of baskets and plastic containers, which are all height adjustable to accommodate containers of all sizes.

BASE CABINETS

LEMANS

The Lemans II corner cabinet storage system combines optimal space utilization and smooth movement. Its two shelves can come completely out of the cabinet thanks to its 85-degree angle door opening. The shelves are anti-slip and height adjustable. The perfect solution for storing pots and pans while ensuring quick access.

E-CARGO WASTE MANAGEMENT CENTER

E-Cargo waste management adds a clean and trendy look that blends with any kitchen interior. The covered slides help avoid the accumulation of dust and ensure a longer life. Over-extension slides provide complete access to bins while the lid blocks odors and provides additional space for recycling large flat items such as newspapers.

UPPER CABINETS

UPPER CABINET PULL-DOWN

An upper cabinet pull-down system makes reaching for what you need easier. Pull down effortlessly on the handle to bring the upper contents of the cabinet towards you for an easier and faster selection. Once you are done, push everything back up. It's that simple!

PANASONIC'S SOFT-DOWN CABINET SYSTEM

I-MOVE

BIFOLD OPENING SYSTEM

A bifold opening system opens and closes smoothly and saves space by folding the front panel as it lifts up. This is a convenient solution for upper cabinets with large, heavy doors. The integrated multi-position stop guarantees the system will stop securely in any position. A very stylish solution for tall wall units.

FREEFOLD

BLUM'S AVENTOS LIFT MECHANISM HF

DRAWER INTERIORS

Transform drawer interiors into highly functional and beautiful spaces. Keep all kitchen tools organized while creating a perfectly harmonious look with a combination of different trays, dividers and boxes to suit every need. They are also easy to rearrange on a whim.

CONNECT MODULAR CUTLERY DIVIDER

STRAIGHTLINE DRAWER ORGANIZER

UNDER SINK CABINET

UNDER-SINK STORAGE SYSTEM

An under-sink storage system helps organize cleaning products and keep everything in its place. Sliding out smoothly, it comes with removable baskets for easy cleaning and helps store a variety of items such as sponges and the like. A practical handle makes it easy to take wherever it's needed.

NETO

PORTERO

TRIPLE TANDEM RECYCLING CENTER

This practical solution for recycling comes with three high-capacity low-height bins that fit perfectly in an under-sink cabinet. The unit slides out to give full access to all 3 bins and the 8.5 L bin comes with a lid for compost odor management.

COUNTERTOP

OPLA-TOP COUNTER EXTENSION MECHANISM

The Opla-Top mechanism is a great way to add extra counter space. It's installed in the same space usually occupied by a drawer, hidden behind a hinged panel. Once the mechanism is pulled out, the surface adjusts flush with the counter, effectively providing an additional 20-inch work area. The surface can match the existing countertop or be made from another countertop material.

As you can see, a few carefully curated in-cabinet accessories can go a long way in enhancing the functionality and efficiency of any kitchen. All these options are easy-to-install and versatile enough to adapt to each client's needs. They are also easy to recommend at the beginning of a project, as it's much more cost-effective to install them during the remodeling than after.
